S

S (es), the nineteenth letter of the English, and the eighteenth of the ancient Roman, alphabet, derives its form (through the ϟ, Σ, Ƨ of early Latin and Greek inscriptions) from the Phœnician W, which represented a voiceless sibilant: in some of the Semitic langs. (s), in others (ʃ). In ancient Greek and Latin the value of the letter is believed to have been always (s).

In mod. English the general rule is that *s* is pronounced (s) at the beginning of a word or of the second element of a compound, and when doubled or in contact with a voiceless consonant. Between vowels, and as an inflexional final element, a single *s* is mostly (z). But there are many anomalies and variations, especially in classical derivatives; cf., e.g., *absurd* (æbsɒ̄·ɹd), *observe* (ŏbz-); *dishonour* (dis-, diz-).

The phonetic combinations (sy), (zy), which arose from the collocation of (s), (z) with the first element of such diphthongs as (yu), (yə) have passed into (ʃ), (ʒ), which are consequently symbolized by *s* in combination with certain letters or groups of letters, as in *sure* (ʃūəɹ), *sugar* (ʃu·gəɹ), *censure* (se·nʃəɹ), *mission* (mi·ʃən), *Asia* (ēⁱ·ʃă), *treasure* (-ʒūɹ, -ʒəɹ), *evasion* (-ʒən).

S is silent in some words adopted from Old French, as in *aisle*, *isle*; in the Law French *mesne*, *demesne*, a silent *s* was inserted by false analogy.

O

O (ōᵘ), the fifteenth letter in the English alphabet, and the fourth vowel letter. O was the fourteenth letter in the ancient Roman alphabet, corresponding in form and value to the ancient Greek O, derived from the sixteenth letter of the Phœnician and ancient Semitic alphabet.

The normal sound of short *o* in modern English is (ǫ), low- (or mid-) back-round-wide; but it frequently stands for (*v*), as in *son, doth*, or (*ŭ*), as in *word*; and in unaccented syllables sinks to (ə), as in *nation.* When original short *o* comes before *r* final, or *r* + cons., as in *or, for, corn, sort*, it is now lengthened into the corresponding long sound *ǭ*; a later lengthening has taken place, chiefly in the South, before certain cons. groups, as in *cloth, cross, off, soft*, here represented by *ǫ̂*.

The normal sound of long *o*, as in *no, toe, bone*, is the quasi- or imperfect diphthong (ōᵘ); but before *r*, as in *bore, choral, story*, the sound is that of the open quasi-diphthong (ǫə).

Such compounds may qualify the designation of (*a*) a person or thing that is the subject and object of the action, as *s.-appointed censors* = censors appointed by themselves; (*b*) a thing that is operated upon, performed, produced, etc. by oneself, as *s. appointed duties* = duties appointed by the person himself; (*c*) a thing conceived as operated upon by itself, as *s.-arched rocks* = rocks formed into arches of themselves without human or mechanical agency; *s.-balanced* = balanced without external support. **b.** Rarely, with adjs. in *-able*; as *s.-impairable* = liable to be impaired by one's own action.
